EDUCATION

Geethanjali College of Engineering and Technology — Hyderabad, India
Bachelor of Computer Science Engineering and Technology ; CGPA: 7.4(until now) — **Expected Graduation: June 2026**

TS RS & Junior College — Korutla, India
Intermediate in MPC; Percentage: 82.3% — **August 2020 - May 2022**

SKILLS SUMMARY

- **Languages**: C,Python, SQL, JAVA
- **Frameworks**: Pandas, Numpy, Seaborn, Matplotlib
- **Tools**: ServiceNow, MySQL
- **Platforms**: PyCharm, Jupyter Notebook,Google Collab
- **Soft Skills**: Rapport Building, Strong Stakeholder management, People Management, Excellent communication

WORK EXPERIENCE

Google AI-ML Virtual Internship — **April 24- June 24**

- Completed a comprehensive virtual internship program focused on foundational concepts of Artificial Intelligence and Machine Learning.
- Built and deployed 3+ ML models using Google Colab, applying concepts like model training, evaluation metrics, and real-time testing.
- Improved a real-time object detection system using YOLOv5 and Faster R-CNN models in Google Colab.
- Captured and processed webcam images to perform object identification with over 90% accuracy, showcasing strong proficiency in computer vision and real-time video processing.
- Demonstrated successful integration of models into live systems, improving inference speed and accuracy in dynamic environments.

PROJECTS

Sports Score Prediction Website — **May 24- June 2024**

- Developed a Sports Score Prediction Website using Python,HTML,CSS,JAVASCRIPT
- Achieved 96% accuracy in real-time angle prediction,intitial acceleration.

Chess Game Using MIN-MAX Algorithm — **October 24- November 2024**

- Enhanced an AI-powered Chess game where the Computer uses MIniMax Algorithm with alpha -beta pruning to determine optimal moves .
- Implemented strategic decision making logic to evaluate board state ,maximize AI and anticipate opponent responses.
- Integrated Pygame for GUI,real time gameplay updates and dynamic viualization of chess pieces and movements.
- Sowcased algoritmic tinking by integrating classic chess mechanics with AI-driven move selection .

License Plate Recongnition — **March 25- April 2025**

- Developed a LPR system using OCR techniques to automatically detect and extract vehicle information.
- Performed image preprocessing,noise eduction and contour detection accurately.
- Trained and evaluated multiple models including Tesseract,CNN and KNN classifiers.
- Achieved hig recognition accuracy by fine-tuning image processing parameters integrating error handling for misreads .

CERTIFICATES

Certified as Entry-Level Python Programmer (Python Institute) — **December 2024**

- Mastered Python basics:variables,data types,control flow and functions.
- Gained knowledge in procedural programming and problem-solving techniques.

AIML - Proternship (Cantilever Labs) — **May 24-June 2024**

- Successfully completed a 108-hour technical training covering Artificial Intelligence and Machine Learning.
- Obtained practical expertise by working on real-time projects,developing proficiency in data analysis and model building.
